Carnforth Urban District Council

Annual Report of the Medical Officer of Health

For the Year 1961.

To the Chairman and Members of the
Carnforth Urban District Council.

Mr. Chairman and Gentlemen,

I have the honour to present for your consideration my Annual Report for the year 1961 on the health, sanitary conditions and circumstances of Carnforth Urban District.

The Registrar-General's estimate of the population at mid-year 1961 was 4,100 an increase of 180 on the previous year. The preliminary report on 1961 Census showed that at midnight 23rd April there were 4,113 persons resident in the District, compared with 3,388 at the 1951 Census. On this basis the population has increased during the decade by 725 or 21.4 per cent.

There were 65 registered live births during the year equivalent to an adjusted birth rate of 15.9 per 1,000 population compared with an average rate of 20.2 for the preceding five years. The national birth rate in 1961 was 17.4 per 1,000 population. Deaths from all causes totalled 48, an increase of 4 over the previous year, giving an adjusted death rate of 13.0 per 1,000 population which may be compared with the rate of 12.0 for England and Wales.

Only one infant death occurred, giving an infant mortality rate of 15.4 per 1,000 live births, compared with an average rate of 31.3 over the previous five years. The national infant death rate in 1961 was 21.4 per 1,000 live births.

The general health of the community remained satisfactory throughout the year, apart from a moderate outbreak of measles in young children.

In the last section of the report your Public Health Inspector has reported fully on the various environmental health services which play such an important part in maintaining and improving living and working conditions in the community.

Of the total 1,341 dwelling houses in the Town almost one half have been built since 1946. Some 700 older houses, built about 1880, although structurally sound are lacking in modern amenities. The repair and improvement of the older types of houses is proceeding slowly with the aid of improvement grants although only owner-occupiers seem to be taking advantage of these facilities.

In conclusion I wish to record my appreciation of the continued interest shown by the Council in all matters relating to Public Health.

Yours faithfully,

R. W. FARQUHAR,

Medical Officer of Health.

SECTION A.

STATISTICS AND SOCIAL CONDITIONS OF THE AREA.

GENERAL STATISTICS OF THE AREA.

AREA of the District (Acres)	1,504
POPULATION (Census 1931)	3,139
,, (Census 1951)	3,388
,, (Census 1961)	4,113
,, (Registrar General's Estimate Mid/1961)	4,100
NUMBER OF INHABITED HOUSES (1951)	1,095
NUMBER OF INHABITED HOUSES (1961)	1,341
RATEABLE VALUE	£47,403
SUM REPRESENTED BY A PENNY RATE	£189

—:0:—

SOCIAL CONDITIONS INCLUDING CHIEF OCCUPATIONS OF INHABITANTS

The social conditions of the District are very satisfactory. The chief occupations of the inhabitants are Railway and Agricultural Work.

SUMMARY OF VITAL STATISTICS—1961

	Males	Females	Total
LIVE BIRTHS (Legitimate)	34	29	63
(Illegitimate)	1	1	2
TOTAL	35	30	65
Crude Birth Rate per 1,000 estimated population			15.9
Adjusted Birth Rate per 1,000 estimated population			15.9

1961 Adjusted live birth rate (comparability factor 1.00)=15.9.
Adjusted death rate (comparability factor 1.11)=13.0.

SECTION B.

GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA

In sections C and D of the report full details will be found relating to infectious diseases and environmental health within the Carnforth Urban District, for which services the Council are directly responsible.

The present section is related to those health services which concern mainly the personal health and welfare of the individual rather than public health and the community. Divisional Health Committee No. 2 of the Lancashire County Council, on which committee your Council has one representative, is responsible for the day-to-day administration of the following services, available to the inhabitants of Carnforth as well as to those of neighbouring districts.

(1) Domiciliary Services.

For the benefit of residents in the area two district nurse/midwives are resident in Carnforth, others being available nearby at Yealand Redmayne and Bolton-le-Sands. Three health visitors, who are also trained nurses, are centred on the School Clinic in Market Street. Several Home Helps are resident in Carnforth and Warton.

(2) Care of Mothers and Young Children.

This service is closely correlated with the domiciliary midwifery, health visiting and domestic help services, by which means the mother can receive advice and care for herself and her child as well as help in the home during and after her confinement.

During 1960 the average attendance at the Carnforth child welfare centre was 46.5 children per weekly session.

(3) Combined School Clinic and Child Welfare Centre.

At 21 Market Street, Carnforth, in addition to the child welfare session on Tuesday afternoons (2-4 p.m.) a minor ailment clinic for school children is held on Friday mornings (9-30-11-30 a.m.). An eye clinic is held on alternate Wednesday mornings, and a dental clinic on each Thursday morning and afternoon. A clinic is held every Thursday afternoon at which expectant mothers attend for relaxation, exercises and the teaching of mothercraft.

(4) Immunisation and Vaccination.

Immunisation against diphtheria, whooping cough, tetanus, and vaccination against smallpox are free services, available either from the family doctor or through the school clinic. Since 1956 vaccination against poliomyelitis and tuberculosis have also been available to children in certain age groups.

(5) Ambulance Service.

The Carnforth area is served by ambulances based on the Lancaster and Morecambe stations.

(6) Other Services.

Certain other services are organised on a divisional basis, without allocation of staff to particular areas. Thus 4 mental health workers and one tuberculosis health visitor cover the whole division. The arrangements for sending persons recovering from illness to convalescent homes are made through the Divisional Health Office, Lancaster.

(7) Welfare Services—National Assistance Act, 1948.

The following welfare services are also administered by the Divisional Health Committee :—

- (a) Residential Accommodation : For persons in need of care and attention not otherwise available to them accommodation is provided at Dolphinlee, The Laurels and Fair Elms at Lancaster ; at the Empress Hostel, Morecambe ; Moor Platt and The Hermitage at Caton.
- (b) Temporary Accommodation : In case of urgent need, e.g. fire, flood or eviction, temporary shelter is provided by arrangement with the County Medical Officer of Health.
- (c) Handicapped Persons : For persons who are blind, deaf, or otherwise substantially and permanently handicapped, certain welfare services and facilities are made available, either through the agency of voluntary organisations or directly by the County Council.

(d) Homes for Disabled and/or Old Persons: There are seven homes of this nature in the division, all managed by voluntary/or private bodies. These are registered and inspected regularly by the divisional medical staff.

(8) Laboratory Facilities.

The bacteriological examination of milk, water and specimens in connection with infectious diseases is carried out by Dr. Robertson and his staff at the Public Health Laboratory, Preston. Samples of water for chemical examination are sent to the Public Analyst at Preston. Analysis of food and drugs is carried out under the direction of the Lancashire County Council.

(9) Treatment Centres and Clinics.

The following clinics are administered by the Lancaster and Kendal Hospital Management Committee :—

- (a) Tuberculosis :—Chest Clinic, Beaumont Hospital, Lancaster.
- (b) Venereal Diseases :—Special Treatment Centre, Royal Lancaster Infirmary.
- (c) Deaf Aid Clinic :—A session for the provision of hearing aids is held at 21, Market Street, Carnforth, on the first Wednesday of each month.

SECTION C.

PREVALENCE OF, AND CONTROL OVER INFECTIOUS DISEASES.

NOTIFIABLE INFECTIOUS DISEASES (other than Tuberculosis) CASES NOTIFIED DURING 1961

Age Periods-Years

Disease	Cases	0-	1-	3-	5-	10-	15-	25-	45-	65-and over
Measles	101	2	33	37	25	4	—	—	—	—
Scarlet Fever	2	—	—	—	1	1	—	—	—	—
Total Cases	103	2	33	37	26	5	—	—	—	—

TUBERCULOSIS.

During 1961 there was one new case of tuberculosis and no deaths from this disease were recorded.

IMMUNISATION AND VACCINATION

Since 1948 only one case of diphtheria has been notified in Carnforth. The young mothers of to-day do not realise the danger of this disease but localised outbreaks still occur sporadically in this country. The present immunisation and vaccination programme now affords a considerable degree of protection against six diseases—diphtheria, whooping cough, tetanus, poliomyelitis, tuberculosis and smallpox, and it is important that every advantage be taken of this service so as to ensure a high level of immunity in the population.

In the following table the numbers of Carnforth children immunised against diphtheria, whooping cough and tetanus in the last six years are compared.

IMMUNISATION IN CARNFORTH — 1956—1961

Number of individuals who completed a full course of primary immunisation.

Age Group	Diphtheria			Whooping Cough			Tetanus		
	0-4	5-14	Total	0-4	5-14	Total	0-4	5-14	Total
1956	68	4	72	65	—	65	57	—	57
1957	75	4	79	72	—	72	71	—	71
1958	73	7	80	74	2	76	66	1	67
1959	75	6	81	76	3	79	72	3	75
1960	95	8	103	92	2	94	92	7	99
1961	58	5	63	57	1	58	58	5	63

Number of individuals who were given a re-inforcement injection.

Age Groups	Diphtheria All ages	Whooping Cough All ages	Tetanus All ages
1956	123	2	—
1957	70	12	2
1958	135	36	3
1959	141	19	5
1960	138	12	36
1961	138	18	78

SECTION D.

SANITARY CIRCUMSTANCES OF THE AREA.

WATER SUPPLY.

Water, abundant in quantity, is supplied from the Lancaster Corporation reservoir situated at Withnets, which has a capacity of 52 million gallons. It is chlorinated and filtered and bacteriological samples taken at various distribution points have been generally good on analysis.

With the exception of 5 private houses and 3 farm houses, all permanent dwellings within the area are connected to the public water supply. The exceptions above referred to have private supplies piped to the building in each case.

SEWERAGE AND SEWAGE DISPOSAL.

The sewerage of the whole area is by gravity. In general it is the "combined" system, though a "separate" system has been introduced to deal with a site of approximately 140 houses, whereby rainwater from roofs and roads is discharged to an open watercourse in order to avoid any additional loading of the Highfield and Kellet Road sewers.

The main portion of the town, which includes the area which has been used for post-war housing expansion, is sewered to a tank alongside the River Keer (a tidal stream) and after settling in this tank the effluent is subject to discharge on ebb tide. Two other sewage disposal plants deal with the remaining portion of the district (the Crag Bank area), each discharging the effluent into adjacent streams after sedimentation and filtration. The tidal tank referred to above undertakes no purification whatever, and is unsuitable as a disposal unit.

PROVISION OF WATER CLOSETS, ETC.

With the exception of six premises, all dwellings (inclusive of farms) within the area have fresh water closets. Pail closets are provided in four cases without water closets.

REFUSE COLLECTION.

The Council continue to tip at Cote Stones by agreement with the Lancaster Rural District Council and arrangements are very satisfactory to the Council.

A weekly collection of domestic refuse is made and trade refuse is collected from various premises. Approximately 1,700 bins per week are dealt with.

HOUSING.

One house has been built by private enterprise. There is very little activity within the area so far as housing development is concerned and it would appear that this form of development is taking place outside the Urban area, rather than within it.

The existing housing facilities are made up as follows :—

604 modern type
458 cottage type
286 parlour type.

Further progress in house improvements has been made during the year by owner-occupiers continuing to avail themselves of the "Standard" and "Discretionary" grants made to them by the Local Authority, 21 of the former and 1 of the latter having been granted.

SANITARY INSPECTIONS.

No. of premises inspected	90
Defects discovered	23
Defects remedied	23
Informal Notices served	23
Statutory Notices served	None

COMMON LODGING HOUSES

There are none in the area.

INSPECTION OF MEAT AND OTHER FOODS AND FOOD PREMISES.

The three butchers in the area are obtaining carcase meat and offal from wholesale distributors outside Carnforth. It is inspected before despatch and as there are no local slaughter-houses within the area the problem of meat inspection at time of slaughter of animals does not arise.

Contact with the shops is, however, maintained, though there has been no occasion for the condemnation of any fresh or imported meat or offal during the year.

Small amounts of tinned foods, surrendered by shopkeepers, have been dealt with.

No fish arriving in the area has had to be certified as unfit for consumption.

MILK SUPPLY.

Action taken with regard to the administration of the Milk and Dairies Acts and Regulations.

The Milk and Dairies Regulations 1949—

No. of distributors registered by the L.A. and operating from :—

(a) Dairies in the district	3
(b) Shops in the district other than dairies			4
(c) Premises outside the district	3

Action taken by the L.A. in relation to samples taken within the district.

	No. of Samples	RESULTS			No Result
		Satisfactory	Un-Satisfactory		
(a) Raw Milk :—					
1. Tuberculosis biological	16	16	Nil	Nil	
2. Meth. Blué reductase	31	29	2	Nil	
3. Brucellosis Ring Test	31	30	1	Nil	
(b) Heat Treated Milk :—					
1. Phosphatase) 5	5	Nil	Nil	
2. Meth. Blue reductase)				
3. Turbidity	2	2	Nil	Nil	

Results of Ministry Investigations Nil

No. of herds examined by veterinary inspectors Nil

No. of cases where animals seized under
 Tuberculosis Order, 1938 Nil

No. of animals seized Nil

No. of cases reported negative where animals had been
 seized Nil

No. of cases reported negative, no animals seized Nil

Action taken under Regulation 19 of the M. and D.
 Regulations, 1949 None necessary

Action taken under Regulation 20 of the M. and D.
 Regulations, 1949 None necessary

ICE CREAM.

There are no premises in the district manufacturing ice cream by the heat treatment process and all premises registered for the sale of ice cream are satisfactory for the purpose.

FOOD POISONING.

There have been no outbreaks of food poisoning within the Urban District during the year.

RODENT CONTROL.

The Council's area has been little affected by rats or mice and no notices have been required to enforce disinfestation.

The Sewers have shown themselves free on test baiting. The sewage disposal works are occasionally found infested, but they are treated when necessary and kept under control.

PUBLIC SWIMMING BATHS.

There are none in the area.

FACTORIES AND WORKSHOPS.

There are 22 in number and all are of a small type. No conditions have been found calling for action and no reports received of non-compliance with the Act.

Mayoh Press Ltd., Carnforth
